The main objective of this event is to raise people's awareness of sustainable cycling through literary expression. Poetry helps to raise awareness of the different ways of thinking from a different point of view. Poetry and cycling are tools of peace that can coexist perfectly. The BICICLETTARIO is mainly a literary competition organized on the theme: bicycle and literature.

This is the idea born in Co.S.Mo.S., the volunteer group that organized the event. Everything stems from the desire to unite the passion for literature with that of the positive aspects of the bike on the body and the human spirit.

4 The bicycle

The bike and his world are the focus of attention.

Their aim is therefore to go back to the origin by practicing this sport without all the technological innovations.

In goliardic race that travel again through the old cycling paths of the past.

6 Sharing

The key point of the event is still sharing the various passions that can unite and create common ideas. Peaceful and cheerful sharing of tales, experiences; culinary specialities and dialects. It's all a great party of union and sharing.
